Examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Weather or not that silicone prevents ingrowth and if the use of a 102 rejection is proper because Mulhauser is silent to that fact. The Examiner held that Eldridge discloses that silicone elastomer, which is used in the Mulhauser reference, discourages ingrowth and serves as a sutiable barrier layer (col. 3, line 65- col. 4, line 2). Since the refence only demonstates the inherent propery of the material and itsn't used as a teaching, the 102 is considered to be proper..
